EXCELLENCE THROUGH MULTIPLE INTELLIGENCE

...unleashing the full potential of men & machines

EXCELLENCE THROUGH MULTIPLE INTELLIGENCE

Introduction of Course

Intelligence has been defined in many different ways including, but not limited to, abstract thought, understanding, self-awareness, communication, reasoning, learning, having emotional knowledge, retaining, planning, and problem solving.

The Theory of Multiple Intelligence is a model of intelligence that differentiates intelligence into specific (primarily sensory) modalities, rather than seeing it as dominated by a single general ability.

Multiple intelligence analysis based on Dermatoglyphics, a term coined by Dr. Herald Cummings, is an advanced technology that extracts information on multiple intelligence through fingerprints. It is then converted into characteristics and advices for the benefit of the individuals. Dermatoglyphics Multiple Intelligence Test (DMIT), enables an individual to know and explore the inherent/ inborn intelligences, learning patterns and their competency and compatibility.

The Workshop on DMIT provides an understanding of the subject, scientific analysis of the report and professional advice and suggestions on the inferences, and practical applications on solving short term, long term and even day-to-day problems dealing with time management, stress management, interpersonal relations, etc.

Course Contents

- Micro-lab
- Introduction to Dermatoglyphic Multiple Intelligence Test (DMIT) and taking Fingerprints for DMIT
- Mind power games
- T.A.T. story writing and analysis
- Reaction time measurement
- Attention
- Sentence completion test

- Learning and brain communication
