## NON LINEAR VIDEO EDITING

...unleashing the full potential of men & machines

## NON LINEAR VIDEO EDITING

## Introduction of Course

Working on a Non-linear Video Editing system involves the process of assembling the cinematographer's video footage logically, in accordance to the script, there by creating your own movie with the director's point of view. With the exponential growth of Media & Entertainment Industry, the demand for Film & Video Editors have equally increased, throughout the country.

After completion of this training and with an impressive show-reel, our trained video editors can find job opportunities in TV & film production studios, advertising & multimedia content development organizations and online news portals too! These editors can work in motion graphics studios and can even establish their own production house. Many of the video editors in metro cities work on freelance basis or on project based contract. You can be one of them, a skilled professional of great demand, in the media industry.
