WEB DESIGNING

...unleashing the full potential of men & machines

WEB DESIGNING

Introduction of Course

The Web Designing training will impart skills to participants for developing websites that integrate the various elements of hypermedia i.e. text, images, motion graphics, sound and video, using designing tools like Photoshop and Flash. The web authoring tool Dreamweaver, provides interactivity to HTML, XHTML, DHTML pages with Java-Script. The course also includes designing the Database with MySQL and connecting it with Server-side Scripting using PHP.

The Graphic and Web Design Industry is expected to grow at a rapid pace, far exceeding even the engineering sector. This growth will lead to an increase in the number of jobs and high demand for trained and skilled graphic designers, web designers and developers.

You can be one of these in-demand professionals.
