LIBRARY AUTOMATION

...unleashing the full potential of men & machines

LIBRARY AUTOMATION

Introduction of Course

Automation of libraries and information centres have become essential for efficiently managing the acquisition of the increasing number of information resources (print and electronic), as well as the increasing number of users making a variety of demands for information. In essence, the capacity to store a large volume of information in a cost-effective manner coupled with accuracy and consistency in processing and efficiency in retrieval of desired information, have made the computer an essential tool for library and information management today.

This course aims at creating awareness about the advantages of automation of libraries and information centres and developing skills for operating an automated library. A special feature of this programme is that participants will be given maximum hands-on-training on the computer.
